Від авторського колективу

Цей спеціальний випуск журналу присвячено науковим дослідженням та технологічним експериментам, які запропоновані українськими вченими та інженерами для реалізації в рамках проекту «Міжнародна Космічна Станція». Навіть такий великий авторський колектив, 210 осіб, не охоплює всіх тих, хто брав участь у виконанні цієї роботи в 1998—2000 рр. Ми висловлюємо щиру подяку всім тим, хто співпрацював з нами на цьому етапі та допоміг у підготовці цього випуску.

Authors' remarks

This special issue of the journal is dedicated to the scientific research and technological experiments, which are proposed by Ukrainian scientists and engineers for the International Space Station program. Even such a large author's team, the 210 persons, does not include all those who have participated in this work during 1998—2000. The authors are grateful to those persons who have collaborated with us at this stage and have helped in preparing this issue.
